

Little McDonald, Kerbs and Paul Lakes LID

Venting Status

July 20, 2013

We had a marathon meeting with the County ad-hoc committee last night July 16th that started at 7 PM and went to 10:30 to prepare the final draft of the operating plan for the use of Ditch 25. At the meeting were representatives from Berger, McDonald, Star, Big McDonald, and Dead lakes plus LID Board members Jeff Volk and Roger Neitzke with are attorney and Houston Engineering. There was a lot of discussion on various parts of the plan that were explained and a few changes made, but none that will restrict the use of the ditch with the conditions included. Water levels, Water Quality, and Invasive Species were the concern. In the end we were able to come up with a plan that all agreed to.

This plan will now be acted on along with our petition to use Ditch 25 at the Ottertail County Board meeting on Tuesday morning July 24th. The exact time will not be known until the County sets its agenda and puts it on their website Friday afternoon July 20th.

All are welcome at the meeting to show support.

Roger A Neitzke
LMKP LID President
